Profile

A motivated Software Developer with a solid foundation in programming and a passion for learning. Committed to leveraging technology to create impactful solutions while contributing to business growth. Enthusiastic about exploring emerging technologies and delivering high-quality results in a collaborative environment. Dedicated to continuous improvement and driving positive change through innovative problem solving.

Skills

UI/UX Design

- Figma
- Wireframing
- Prototyping
- Responsive Design

Back-End Development

- Python, Django Framework, Django Rest API
- Node.js, Express.js
- MySQL

API Development

- RESTful API design and integration

Cybersecurity Tools & Technologies

- Burp Suite (PortSwigger)

Front-End Development

- HTML, CSS, JavaScript (ES6)
- ReactJS, React-Vite
- Bootstrap, Tailwind CSS, Material-UI

Other Tools & Technologies

- Git-based version control (GitHub, GitLab), Postman
- VS Code
- Vercel
- Project Management

Programming Languages

- Python
- C
- C++
- JavaScript (ES6)

Education

06/2019 – 08/2023

BTech-Electronics and Communication

APJ ABDUL KALAM TECHNOLOGICAL UNIVERSITY

Professional Experience

06/2025 – present

Calicut, India

Project Associate – Information Security

National Institute of Electronics and Information Technology (NIELIT), Calicut

- Supported the execution of the national ISEA project by assisting in cybersecurity policy implementation, vulnerability assessment, and risk management initiatives.
- Leveraged Programming languages and modern web development technologies to build secure, user-friendly tools for cybersecurity training, automate vulnerability detection workflows, and develop dashboards for risk analysis and reporting.
- Participated in cybersecurity research and associated with the publication of two technical papers, staying updated with evolving cybersecurity threats and technologies.

07/2023 – 12/2023

Thrissur, India

Python-Django full stack development intern

GALTech Technologies Pvt Ltd

- Focused on full-stack web development, database management, and delivering enhanced user experiences through responsive and intuitive design.
- Committed to continuous learning and staying updated with the latest technologies, frameworks, and best practices to develop scalable and efficient applications.

06/2024 – 06/2025
Ernakulam, India

Software Developer Technical Trainee

Kerala startup mission | SuperFablab Kerala

- Developed and maintained responsive web and mobile applications using React, Material-UI, and Tailwind CSS, implementing intuitive user interfaces and ensuring seamless navigation with React Navigation. Integrated backend services using Fetch API utilizing React Hooks for dynamic state management.
- Designed and built scalable web applications with Python, Django, and RESTful APIs, ensuring optimal performance and maintainability. Applied UI/UX design principles to enhance user experience and delivered robust solutions by collaborating with cross-functional teams.

Projects

FabStash - Inventory Management System

- Developed a full-stack inventory management system for FabLab Kerala using React.js and Django REST Framework, incorporating features like component search, request handling, and real-time stock tracking.
- Implemented role-based access control and secured authentication using JWT tokens and Google OAuth.
- Built a responsive and intuitive UI using React Router, Context API, and Material-UI, with a dashboard for analytics, request logs, and component statistics.
- Supported the setup and maintenance of Fab Lab equipment inventory used in digital fabrication for projects.

DORA: DIGITAL OFFICE RECEPTION ASSISTANT

- Led an AI-driven modernization project to automate receptionist tasks, including call handling and voice-enabled responses, enhancing operational efficiency.
- Successfully streamlined call management, reducing manual workload and improving visitor greeting protocols for a seamless front-office experience.
- Designed a hardware-software integrated system using electronics components (GSM module, sensors) and AI tools to automate real-world reception functions.
- Developed AI features with a strong focus on data privacy and secure API interactions to ensure safe and reliable system operations.

Shopping Cart Application

- Developed a React-based shopping cart application featuring automatic free gift functionality and a progress tracker that adds or removes the gift based on a ₹1000 threshold.
- Implemented real-time cart updates using Context API and built a responsive UI with Material-UI for smooth cross-device compatibility.
- Designed an intuitive interface with real-time state management to enhance user engagement and seamless checkout experience.

SVG Image Editing App

- Developed a responsive SVG editing web application using React that allows users to import, manipulate (scale, rotate, translate), and save/download SVG images.
- Implemented undo/redo functionality and real-time rendering updates to ensure a seamless and interactive user experience.
- Integrated intuitive controls with visual feedback for precise image manipulation, using React Router for smooth navigation and CSS for a clean UI.
- Designed the tool to also serve as an educational aid for teaching geometry and computer graphics concepts through hands-on visual interaction.

Portfolio Website

DhiyaJoseph/DhiyaJoseph-portfolio 

- Developed a modern, responsive portfolio website using React.js to showcase projects, skills, and achievements.
- Implemented a dark theme UI with smooth scroll animations and interactive elements for an enhanced user experience.
- Applied responsive design principles using CSS3 to ensure compatibility across devices.

Publications

- Achieved First prize in Aavishkar Technical Paper Presentation 2023, Gregorian Institute of Technology Presented paper: “AI Receptionist with Alcohol Detection Capability”
- Publication – “DORA: Digital Office Reception Assistant”, IJSREAT, Vol. 3, Issue 3 (May-June 2023)
